Attached is the draft plan for East Chicago resident notification based on the meeting we held on Friday. There are a number of outstanding questions or issues highlighted in yellow. Please let me know if you have comments on this draft plan.

Water did commit to contacting residents with the results and explanation. How and when may still be under consideration. Please work with Dean, Peg and Miguel to

develop aa plan ASAP

Tim and Chris, Can you advise on whether Water Division is taking the lead to provide notification to East Chicago residents by phone calls and/or letters? The email from Chris below appears to only make the commitment of WD for helping with sampling in Phase 2. Dean's message recommends that WD call residents with preliminary results ASAP. Heather and I thought that Superfund had the lead and that Miguel had coordinated with Tim Drexler on this.

Tom/Rita/Tim/Heather: Given the delays with Superfund's lab I would recommend WD call residents with preliminary data as soon as possible. I know the plan was to wait until final data was in hand but that could take a long time as Superfund's lab is experiencing delays with turning even preliminary results around. Have no idea how long it will take to get final data. Not sure who you have lined up to make calls in GWDWB but it would be good to get the process started asap. We only have preliminary results from two homes so far. I heard that a bunch more might come in Friday. We will keep you posted.

Thanks,

Dean

Subject: RE: Request for Water Team Support in East Chicago

Hey Doug:

We would like to support Superfund on this effort. I'm assuming we would be observing SFD's contractor to ensure sound sampling and analytical practices, as we are currently doing. Is that accurate? Thanks.

Subject: Request for Water Team Support in East Chicago

Chris,

As I indicated this morning, Superfund Division will begin mobilizing for the Zone 2 residential soil cleanup this week in East Chicago. I would like to request Water Team support for the tap water sampling in Zone 2. At this stage, we plan on addressing 11 homes in Zone 2 for the remainder of the construction season. These home have indicated concentrations of lead and/or arsenic above removal action levels. I would also request that members of the Water Team providing onsite support to the USS Lead site inform the EOC of their deployment.

If you have any questions, please let me know.

Thanks. Doug

Douglas Ballotti
